

# HDMI (TV) Based Display

**HEATCON SYSTEMS**  
Sensing & Control Solutions

Heatcon has the expertise to display production & process data on TV screens. The data like shift target / actual count / difference can be displayed on TV screens on the shop floor. Process, Temperature, flow can also be displayed.

## Features

- Input from sensors, MODBUS or computer.
- Shift wise settable target
- Reports with date and time stamp
- PC interface for data recording
- Display on 32" / 42" /55" / 70" TV screens for any HDMI display

## Additional Features

- Timing settable for messages
- Easy to add /remove message screens
- Can be interfaced with existing TV with HDMI port
- Wireless connectivity
- Low cost to utility ratio

**Apart from production data, the TV screen can be intermittently used to display following messages:**

- 1 . New products launched
- 2 . Safety messages and 5-S messages
- 3 . Welcome message for guests
- 4 . Birthday messages
- 5 . Flow chart or mimic diagram of process
- 6 . Production bar graphs / pie charts
- 7 . Accident free days
- 8 . Do's and Don'ts
- 9 . Best Employee / Best Performer Greetings
10. Live production count monitoring
11. Live process monitoring
12. Videos can be played
13. Connect to database / ERP
14. RS 485 / Digital input
15. Food court displays
16. Parking displays
17. Security alarm displays
18. Waiting room displays
